PROFILE

I am a skilled Software Developer with expertise in building mobile applications for both iOS and Android platforms. Proficient in JavaScript, TypeScript, Redux, and Firebase, I develop seamless cross-platform solutions with a focus on real-time functionality, responsive UI design, and intuitive user experiences. My experience in API integration ensures secure authentication, efficient backend communication, and smooth data exchange to enhance overall app performance and engagement.

PROFESSIONAL EXPERIENCE

React Native Developer

Mubbits

Oct 2024 – present
Islamabad, Pakistan

- Developed cross-platform mobile applications using React Native, TypeScript, and JavaScript with a strong emphasis on UI/UX, smooth interactions, and responsive design
- Integrated Google Maps API for navigation and real-time geolocation tracking, along with RESTful API integration for backend communication
- Implemented advanced features including biometric authentication, barcode scanning, push notifications, and secure payment gateway integration
- Optimized state management using Redux and Context API, minimizing unnecessary re-renders and improving application performance through best practices
- Conducted code optimization and debugging to ensure high performance, reliability, and maintainability across various devices and platforms

React Native Developer

Agronomics Pvt. Ltd.

Jul 2024 – Sep 2024
Islamabad, Pakistan

- Developed cross-platform mobile apps using React Native, TypeScript, JavaScript, ensuring performance, scalability.
- Integrated Firebase for real-time sync, implemented REST APIs with caching, error handling, optimized responsiveness.
- Managed state with Redux, Redux Toolkit, Context API, improving performance, scalability, and user experience.

PROJECTS

AR-Based E-Commerce App

Fyp Project

- Developed a mobile application integrating Augmented Reality (AR) to enhance the online shopping experience.
- Implemented real-time 3D product visualization, allowing users to preview items in their environment before purchase.
- Utilized React Native and AR frameworks to ensure cross-platform compatibility and smooth AR rendering.

BuyNothings – Used Products Marketplace App

Company Project

- Developed a buy-and-sell platform for users to list and purchase pre-owned items.
- Implemented image-based product posting, allowing users to upload pictures and add descriptions.
- Designed a chat/messaging system to facilitate direct communication between buyers and sellers.

Activity Maps

Company Project

- Developed a cross-platform mobile app where contributors can add places (e.g., cafés, restaurants) and create events, while users can view them on a map and make reservations
- Integrated features like Google Maps API, push notifications, biometric authentication, barcode scanning, and secure payment with subscription handling
- Optimized app performance through Redux-based state management, efficient RESTful API communication, code optimization, and bug resolution

VCROW

Company Project

- Developed a dual-portal app for parents and schools using Firebase, allowing device management, app restrictions, and push notifications
- Implemented question management and payment system for parents to purchase question sets; questions appear for kids during usage
- Created analytics and reporting features showing kids' performance through interactive graphs on parent and school portals

Bulky

Company Project

- Developed a multi-actor app with User, Helper, and Rider roles for transporting goods between locations
- Implemented location-based booking, weight-based helper assignment, and secure payment integration for seamless order processing
- Implemented location-based booking, weight-based helper assignment, and secure payment integration for seamless order processing.

SKILLS

Programming Languages — JavaScript, TypeScript, C++, Python | **Mobile App Development** — React Native, Redux, Redux Toolkit, Context API | **Backend & Databases** — Firebase, SQL Database, MongoDB | **Version Control** — GitHub | **Testing Tools** — Selenium, Cypress | **Core Programming Concepts** — Object-Oriented Programming, Data Structures & Algorithms

EDUCATION

Comsats University Islamabad <i>BS Software Engineering</i>	Aug 2020 – May 2024 Islamabad, Pakistan
Punjab Group of Colleges <i>FSc Pre-Engineering</i>	Sep 2018 – May 2020 Gojra, Pakistan
